Vasculata™ is an intense four-day course targeting newcomers to the vascular biology field. This course introduces attendees to the basics of cardiovascular biology through seminars and hands-on workshops that provide unique learning experiences above and beyond those found in text books.

**Program includes the Following Sessions:**

- Development of the Cardiovascular System
- Frontiers in Cardiovascular Medicine
- Cardiovascular Complexity
- Communication in the Vasculature
- Common Cardiovascular Diseases
- Vascular BioMechanics
- Genetics of Cardiovascular Disease
- The Actual Stuff in the Vasculature
- Immunology and Inflammation

Also,

- Hands-on workshops
- Career Development Panel Discussions
- Scholarships
- Affordable housing
- Poster sessions
- Network with peers
- Network with faculty

Scholarship applications due June 1

Abstract deadline is June 15
