The Pitt Lab studies voltage-gated ion channels, and the diseases that result when ion channel function is perturbed. Using rare human diseases, the lab has recently uncovered unexpected functions of specific ion channels in both physiology and pathophysiology.

**General Lessons from Rare Diseases**

The Pitt Lab studies voltage-gated ion channels, and the diseases that result when ion channel function is perturbed. Using rare human diseases, the lab has recently uncovered unexpected functions of specific ion channels in both physiology and pathophysiology.

**Thursday April 20, 2017**
**11:00 AM-12:00 PM**
**MR5 3005**

Hosted By: Brian Annex, MD
Refreshments Served
