Sustainability and Green Labs at the University of Virginia

Lab buildings use up to five times more energy than office buildings. The University has demonstrated its commitment to lowering greenhouse gas emissions through the formation of our Office for Sustainability and Green Labs Program. This seminar will provide a broad introduction to sustainability at UVA and a more detailed exploration of newer strategies to scale the successes of 2018 in collaboration with partner labs and departments.

Thursday January 24th, 2019
11:00 AM-12:00 PM
MR5 3005

Hosted by: Tori Osinski
