The Robert M. Berne Cardiovascular Research Center Presents

**Pradeep Natarajan, MD, MSSc**

**Affiliation:** Director, Preventive Cardiology Assistant Professor of Medicine, Harvard Medical School

**Clonal hematopoiesis and risk for atherosclerotic cardiovascular disease**

Acquired blood-cell mutations in leukemic genes have been recently been linked to atherosclerotic cardiovascular disease. This talk will focus on the human genetic evidence supporting this new association as well as strategies to reduce atherosclerotic cardiovascular disease risk.

**Monday December 12th, 2019**

11:00 PM -12:00 PM  
MR5 3005

Hosted by: Ken Walsh, PhD  
Refreshments Served
