The Robert M. Berne Cardiovascular Research Center Presents

**Ukpong Eyo, PhD**

**Affiliation:** Assistant Professor - Department of Neuroscience Center for Brain Immunology and Glia (BIG) University of Virginia

**Dynamics of capillary associated microglia (CAMs) in health and disease**

Microglia are the brain’s resident immune cells and physically interact with the various elements of the central nervous system (CNS) but their interactions with unique CNS vasculature has been poorly studied. In this talk, I will present our recent findings elucidating the extent and dynamics of capillary associated microglia in the healthy mouse brain and in pathology.

**Thursday April 16th, 2020**
**11:00 AM-12:00 PM**
