Targeting aging to transform health

This seminar will highlight advances in the understanding of cellular senescence as a driver of aging and aging-related conditions. Recent work examining candidate biomarkers of senescent cell burden, their associations with important health outcomes in humans, and responsiveness to intervention will also be discussed.

Thursday April 14th, 2022
11:00 AM-12:00 PM

Claude Moore Nursing Education G120 or Via Zoom

Hosted by: Zhen Yan, PhD & Eyleen O’Rourke, PhD
